

a**Explicit insertion-modeling workflow**

48/48 tagged models completed geometry QC

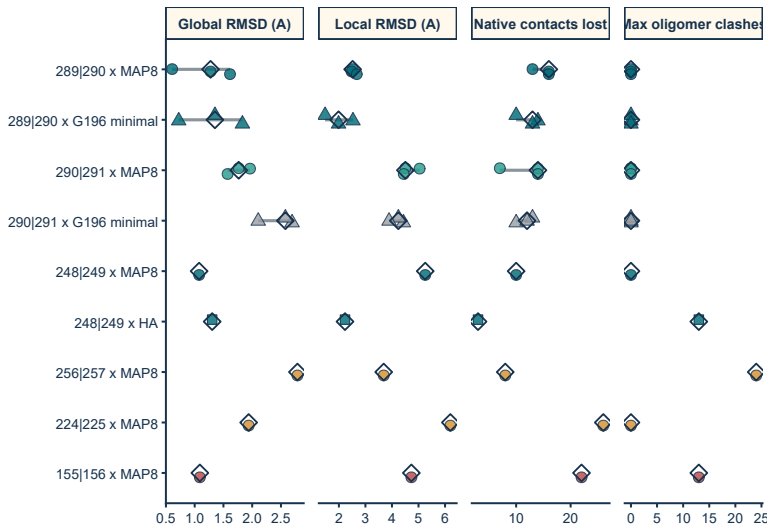

40 constructs | 48 inserted models | 96 hexamer evals

**b****Global structural perturbation landscape**

Each point is one inserted model; dashed medians are visual guides, not pass/fail cut-offs.

**c****Focal construct comparison**

Individual models; open diamonds mark medians and grey lines show model ranges.

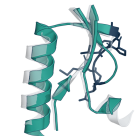

**d Representative WT overlays**

WT grey; construct class colour; tag dark.

289|290 x MAP8 | lower local perturbation

290|291 x MAP8 | adjacent-junction contrast

248|249 x MAP8 | global/local discordance
